The Rising Eminence of Science at Rollins — story on page 4

# an alumnus speaks

by THOMAS M. BRIGHTMAN '65

*On page 14 of this issue, there is a "Memo from the Director" outlining the status of Rollins College Alumni Giving. We feel the following excerpt from a letter from Alumnus Tom Brightman to his class agent, Thomas Brew, is apropos to the memo. Mr. Brightman is currently manager of distribution services for Alcoa in Pittsburgh. — Ed.*

... Please accept this letter as constructive criticism of the methods class agents use to appeal for monetary support of the Rollins Alumni organization.

My fund-raising experience has been quite limited; but perhaps you will agree that before our classmates will contribute, they have to have a basic desire to support the college. However, good intentions and the basic susceptibility to an appeal are by themselves certainly not enough to generate hard cash. Beyond this, one has to be provided with an appropriate stimulus before actually contributing. It appears to be a matter of identifying those who are susceptible to an appeal to contribute, stimulating them to action, and then making it as simple as possible for them to respond when their emotions say, "Give."

I refrain from mentioning the ability to give because ALL Rollins Alumni are able to contribute, however small the amount may be. Yet, this final consideration is important in that among Rollins Alumni there are certainly varying degrees of ability to contribute; and it would, perhaps, be a good idea to identify this stratification of ability to contribute and make specialized appeals to each level. Almost everyone is susceptible to some type of appeal.

If we agree this far, the question then is, "What makes Alumni want to contribute?" If we find this answer, we also find the key to the stimulus to precipitate the actual contribution.

May I say that I am convinced that the practice of annually contributing must be established in the early years following graduation before Rollins slips too far to the back of one's mind because of the press of daily adult living.

I personally contribute for three principal reasons plus an intangible feeling that it is simply the right thing to do. I feel deeply that sustaining educational institutions, and particularly the one I attended, is as essential to peace of mind as sustaining one's body with food and sleep. My contributions are my way of constructively demonstrating faith in the world in which I live — faith in the things I value. Rollins opened the world to me in a way that defies definite explanation.

In a sense, I want to insure that Rollins remains free of financial difficulties so that it can serve as a vehicle for others to broaden their horizons, to open the world to them in their own personal way. Through the minds of its students, Rollins surely stands not as an inanimate physical institution but as a living vibrant organism which, though it depends on the minds of the young for life, somehow magnifies their searchings into the future of this country.

Other than the intangible reason, which is perhaps the most important, as outlined above, the three reasons I contribute are as follows:

1. As a scholarship student, I have a willing obligation of supporting the system that supported me.
2. I wish to preserve the private liberal arts college for future generations of students.
3. I contribute to Rollins in particular as sort of a thank-you token for the many pleasant memories which it provided.

As a practical note, remind our class members that most employers today have programs which match gifts to education. Each year I personally feel that I have really contributed the net amount of both my direct contribution and that of my company. Where such programs do exist it is indeed unfortunate that Alumni do not allow their employers to contribute to the institution that prepared them for the job they're holding.

**ABOUT THE COVER:** Towering over most of the other buildings on campus, the magnificent new Archibald Granville Bush Science Center is rapidly nearing completion. Scheduled for occupancy early in 1969, the facility will house Rollins' scientific laboratories, lecture halls, classrooms, libraries and offices. Dr. Robert E. O'Brien, Coordinator for the new Bush Science Center, discusses the role of science in Rollins' curriculum in a feature article beginning on page 4 of this issue.

The ALUMNI RECORD is published by Rollins College Alumni Association, Winter Park, Florida, four times per year, and is distributed to graduates, former students, and seniors of Rollins College. Second-class postage paid at Winter Park, Florida 32789.

VOLUME 46

NUMBER 1

Dolls 11-2-71

In the modern world the approach of rational inquiry — the mode of thought which underlies science and technology — is spreading rapidly, and in the process is changing the world in profound ways. The spirit of rational inquiry, driven by a belief in its efficacy and by restless curiosity, is therefore commonly called the spirit of science. The term science is accurate but inadequate. It does not do justice to the fact that this mode of thought relates also to questions men usually ask and answer for reasons which they think totally nonscientific—religious, aesthetic, humanistic, literary.

The spirit of science infuses many forms of scholarship besides science itself. Rollins' faculty,

graduate and undergraduate students are actively engaged in classroom discussion, laboratory experimentation and field studies which manifest the newest developments in a dynamic and rapidly changing science field. The science faculty participate in summer science institutes or devote this period of time to research projects which enhance their professional standing and teaching ability. Science students participate in independent research studies with emphasis on basic concepts of a particular scientific field (Astronomy, Biology, Chemistry, Mathematics, Physics) that can be learned within the framework of the new Rollins curriculum. This involves

scientific inquiry into techniques, methods, data analysis and practical application of this knowledge to current needs and usage. The following statement of objective made by the science faculty in 1967 exemplifies their immediate goals.

"Our overall objective is to develop an outstanding undergraduate science program based upon the concept of the liberal arts tradition of broad exposure and depth of training in both the arts and sciences, combined with the Rollins ideal of 'Individualized Education.' Toward this end we are dedicated to the idea of quality in teaching, and have incorporated this philosophy into our objectives."

The question is often asked, what happens in the field of science in a typical year at Rollins? I will attempt to answer this question by mentioning only one atypical event and then proceed on from there. The initiation of the Archibald Granville Bush Science Center in 1967 produced keen enthusiasm toward its completion and full utilization. It is only fair that I clarify the fact that although the new science center will be much larger than the present Knowles science building there will be about three times as much usable classroom and laboratory space as in Knowles. Where small laboratories and scientific equipment formerly had to be used on a multiple basis, now the laboratories and equipment will be used more efficiently and effectively with individual courses. Where some faculty offices were actually part of a laboratory or where laboratories were used for classrooms, there will be individual faculty offices and research laboratories with specific classrooms available to them. Also, student research laboratories will be available for independent research project use. During the 1967-68 academic year science instructors had to use the Crummer, Park Avenue and Ingersoll buildings for classes and laboratories, with the Mathematics Department separated from the other departments of the Science Division. All departments will be housed in the new

## SCIENCE at ROLLINS: a typical year

by DR. ROBERT E. O'BRIEN

*Dr. O'Brien received his Ph.D. from Clemson University in 1963. He came to Rollins shortly after graduation and has completed his fifth year as a member of the Rollins Faculty. During the academic year 1968-69 he is a member of the Faculty Administration Committee and the Academic Standing Committee. He is presently Chairman of the Science Division and was asked to serve as Coordinator for the new Bush Science Center on February 1, 1968. Dr. O'Brien is also active in basic research studies dealing with changes in the ecology of Central Florida's fresh water lakes.*

*A great deal of concern has arisen in recent months over the problems of weed control in Florida's lakes and rivers. Numerous local, state and national studies are now underway to determine the effectiveness of various control methods under consideration. One of these studies, a basic research in lake ecology, is being carried out by Dr. O'Brien in cooperation with the Orange County Water Conservation Laboratory. A description of the program is contained in the conclusion of Dr. O'Brien's article.*

— Ed.

building and they will be completely functional within the framework of this building. This is an extraordinary milestone in the history of science at Rollins. In addition, there will be a splendid auditorium with seating capacity of 350, a demonstration lecture classroom with seating capacity of 94 students, a large Questar observation telescope, and an astronomy observation deck on the roof. Several specialized areas include a glass blowing room, a machine shop, cold and warm animal rooms, controlled environmental growth walk-in rooms, X-ray diffraction room, nuclear isotope room, a chromatographic room and a science library. The new building will be completed in November, 1968, and the physical move to it will probably take place in January, 1969.

And now for some of the highlights of academic year 1967-68 and the summer months of 1968:

#### ACADEMIC YEAR:

Several selected senior students participated in original Honors research projects involving literature review and research programs which terminated with written and oral examinations given by Departmental faculty.

A few freshmen science majors were active in an Honors Directed Individual Study course with Dr. Wavell, Director of the Honors Program, during the Winter term.

In addition to the special Honors projects over forty selected junior and senior science majors participated in Winter term research projects under the supervision of individual faculty members. Most of these experimental studies were conducted in the laboratory, but several ecological studies were conducted in the field.

Of the 236 undergraduate candidates that received Rollins degrees last June, there were 23 who received the Bachelor of Science degree. Many of these students received either scholarships, fellowships or assistantships for graduate work. These include the following: Terry Bunde, fellowship to the University of Florida, Biochemistry; Forest Deal, Jr., full

scholarship and stipend to Brown University, Applied Mathematics; William Older, National Science Foundation scholarship to Princeton, Mathematics; Ronald Sans, assistantship to Wake Forest, Analytical Chemistry; George Sanzero, fellowship to the University of Tennessee, Organic Chemistry with collateral study in Biochemistry.

The longest biology field trip that had ever been taken up until 1965 during the regular academic term was for a period of five days. With the short winter term and the independent study program that was produced as a result of the new curriculum at Rollins, a field trip was taken for one full week in 1967 with such success that plans were started toward a one-month trip in 1968. Through a grant from the H. H. Powers Foundation for summer travel outside the U. S., I was able to visit

several natural undisturbed habitats. I traveled in Central America and the West Indies during the summer of 1967 comparing some of the established biological field stations that focused on studies in Tropical Ecology. The location that was chosen was the well known Barro Colorado Island midway of the Panama Canal on Lake Gatun, and maintained by the Smithsonian Institution. In July, 1946, the Canal Zone biological area had as its purpose that of "setting aside such an area — to preserve and conserve its natural features, including existing flora and fauna, in nearly as natural a condition as possible, thus providing a place where duly qualified students could make observations and scientific investigations for the increase of knowledge."

On January 8, three Rollins students and three seniors from Stetson University were qualified and in a position to schedule this trip. Preparatory plans were completed and the trip became a reality. The first four days were devoted to walking the thirty miles of jungle trails to learn the different types of habitats and to the utilization of the Smithsonian field library for individual student literature reviews concerning their field projects. After many hours of walking, reading and talking to resident researchers, each student had to

submit a proposal outline and have it approved. The necessary field equipment for each project was procured with only three weeks remaining to accrue the necessary data. Analysis and writing of the project paper were completed after returning to Florida. The students presented the project results along with color slides and a color movie of their Panama trip to the Rollins Scientific Society, the local chapter of Sigma Xi and the freshmen Biological Science Foundation Course.

Through the efforts of Dr. Hellwege, fourteen selected junior and senior students and five science faculty participated in a two week Mobile Radioisotope Laboratory Program conducted for the United States Atomic Energy Commission by the Special Training Division, Oak Ridge Institute of Nuclear Studies.

The Oak Ridge Mobile Radioisotope Laboratory Program provides college faculty members specialized instruction in radioisotope theory, techniques and applications for use in their teaching and research activities. The lasting value of the program — the purpose for which it was designed — resides in the instruction for members of the science faculty. The program is, of course, useful to advanced undergraduate science majors and is open to them when space permits.

The course of instruction lasted two weeks and involved a ninety-

minute lecture daily to as many as could be accommodated in the lecture hall, including those who were to receive laboratory instruction, and a daily two-hour laboratory session for each full participant. It was based on the four-week full time basic research (radioisotope techniques) course offered more than one hundred times by the Special Training Division since 1948. It is estimated that the cost of each two-week program averages \$3,000 and the work is worth the equivalent of 2.5 quarter hours of graduate study.

In the Spring term the Chemistry Department participated in a "Meeting in Miniature" in cooperation with the Central Florida chapter of the American Chemical Society in Orlando. This meeting was divided into two parts. One, the Seminar, where talks were given on the latest developments in the field of Chemistry. And two, the instrumentation part, where various companies were invited to display their newest Laboratory equipment. At this meeting, George Sanzero, a senior chemistry major, presented a paper on an independent project that he did under the guidance of Dr. Blosssey of the Chemistry Department.

Several guest lectures were presented to Science Division classes and to the Rollins Scientific Society, an organization composed of science faculty and students. One of these was Dr. George Gamow, the famous physicist and author of several books, who lectured to all five colleges that make up the Associated Mid-Florida College group which includes Rollins.

Another speaker was R. Buckminster Fuller, engineer, philosopher, and designer of the famous geodesic dome featured at the recent New York World's Fair. He also designed another version which housed the U. S. exhibit at Expo '67 in Montreal.

Also, Dr. Gordon Killinger lectured under the sponsorship of the Visiting Scientist Program. Dr. Killinger has been responsible for developing and teaching courses in pasture and forage crops and tropical and forage crops science for

advanced students at the University of Florida. He spent two years in Costa Rica under American International Development through a University of Florida contract and served as a consultant on pastures in Panama and with AID in Costa Rica.

The Rollins Scientific Society schedules weekly lectures presented by professional people on current topics of interest to science faculty and students. For example, faculty members, medical doctors, geneticists, conservationists, and agriculturalists were among those who were on the agenda during the academic year.

In addition to attending many professional science meetings the science faculty participated as judges in the State of Florida Junior High and Secondary School Science Fair and talent search program held at Melbourne.

#### SUMMER ACTIVITIES:

Dr. Paul A. Vestal, Professor and Head of the Biology Department, was chairman of the writing team, Plant Physiology Section, Intermediate Science Curriculum Study, Florida State University for eight weeks. He was also Director and Teacher of the Mary Melrose Foundation Science Program for elementary teachers, Rollins College, four weeks, and presented two scientific papers at the American Institute of Biological Sciences National meeting in Ohio.

He is the author of eight articles written for the Science and Technological Division, McGraw-Hill Publishing Co.

Dr. Herbert Hellwege, Professor and Head of the Chemistry Department, attended the National Science Foundation, Institute for Physical Chemistry teachers in Quantum Chemistry, Tufts University, Massachusetts, six weeks, and at Oak Ridge Nuclear Research Laboratory, Tennessee, conducted a research project titled "Solubility of Salts and Water Organic Solubility," six weeks.

Dr. John S. Ross, Professor and Head of the Physics Department, and Director, Masters of Science Program, directed students on a "Computer Program for Isotope Shift Consonants," through an Undergraduate Research Participation grant from the National Science Foundation.

Dr. Erich Blossey, Assistant Professor of Chemistry, conducted a research project with "Steroids" for fourteen weeks at the Department of Chemistry, Stanford University, California.

Dr. George Cochran, Assistant Professor of Chemistry, through a grant from the Powers Educational Trust for Faculty Travel Fellowships to Rollins College, received funds to trace the travels of Danish astronomer, Tycho Brahe, to discover more history regarding formulation of an accurate theory of the stars. His travels took him to Halsinborg and the island of Hveen in Sweden; Copenhagen, Denmark; Rostock and Augsburg in Germany; and Prague, Czechoslovakia.

Dr. Joseph Mulson, Associate Professor of Physics, worked at the Naval Training Device Center in Orlando on a research project in "Optics and Halography."

Dr. John S. Bowers, Associate Professor and Head of the Mathematics Department, was director of the NSF sponsored Secondary Science Training Program at Rollins.

Dr. Robert E. O'Brien, Associate Professor of Biology, directed students in basic research studies in lake ecology, cooperative with the

Orange County Water Conservation Laboratory.

It is sometimes difficult in a Liberal Arts, teaching-oriented college to establish and fund research programs which involve not only faculty, but selected undergraduate students who can effectively carry out independent study projects. In the past, several students have worked during the summer months on research projects supervised by science faculty. In addition faculty have conducted research in such fields as atomic spectroscopy, surface distribution of atoms on tungsten, plasma physics and radioactive tracer techniques on certain compounds. Cooperative research programs are active with local cities, Orange County and the State of Florida involving basic studies in fresh water ecology. Students often are able to use other Laboratories for valuable "on-the-job" training during the summer months and aid in obtaining data which is important to water pollution studies, pesticide studies, and aquatic weed control.

Such an experimental investigation is presently being carried out to learn: (1) more about the changing environment in Central Florida's fresh water lakes, (2) the effect these changes are having on the biological populations, (3) the part man is playing in causing these changes.

Florida's numerous fresh water lakes and streams are faced with

the effects of eutrophism, sewage and chemical pollution, the silting through agriculture, the digging of canals, the weakening and salinization of its water table, and hurricane control. Very little information is available concerning the changing environmental relationships of biological populations in these lakes.

The experimental investigation now underway involves collection, quantitative determinations and identifications of plankton and bottom fauna from a typical chain of lakes in Central Florida. This investigation also includes physiochemical determinations of the lake water. The information should be collected year-around in order to show seasonal environmental changes which are sometimes missed, but are pertinent to understanding lake ecology.

It is the intent that the data from two or more years of investigations could be utilized for further study on reduced water quality caused by organic pollution, especially in heavily populated areas. This study

will eventually include chemical and biological analysis for pesticides present in samples of lake water taken periodically.

Research methods, materials, and results are also planned to be used to improve student laboratory and field training in courses offered in ecology and possible future courses in aquatic biology.

**FRANK RITTI**  
Pompano Beach, Florida.

Coming to Rollins on an academic scholarship plus a Regents scholarship, Frank ranked in the top 2% of his class at Pompano Beach High School.

**ORTRUN BERGER**  
Bremen, Germany.

Daughter of Rollins alumnus, Peter Berger, Ortrun received a Rollins Chapel Scholarship for 1968-1969. She is a transfer student and a senior this year. During 1964-1965 she was an exchange student at Owosso High School in Owosso, Michigan. Ortrun is studying history and public affairs.

**JAN ZELENKA**  
Prague, Czechoslovakia.

Another transfer student, Jan is on a private full scholarship and formerly attended Charles University in Prague. He hopes to major in American and English literature.

# new arrivals on campus

With the start of orientation week last month, Rollins College greeted the 330 members of the Freshman Class and 34 transfer students. Figures compiled last July show that from 1,176 completed application there were 763 accepted and 364 actually enrolled.

Approximately two-thirds of the entering Freshmen (64%) came to Rollins from public schools and a little over one-third (36%) were from independent schools.

There were 183 applications for financial aid, and 81 of these were granted. Average amount of financial aid for male students this year is \$2,012, and for female students the average is \$1,632. Total financial aid for students entering in this academic year is \$153,841.

The Freshman Class represents students from 32 states and 16 foreign countries. About 20% of the class are from Florida, 43% from the Northeast and Atlantic seaboard, and 37% from the Midwest and other areas. Rollins has no geographic quotas, and admits qualified students from any location.

Qualifications of Rollins' new students are varied and quite interesting. We think you will enjoy meeting here some of the outstanding young men and women who are representative of the Freshman Class and transfer students . . . all of whom are future Rollins ALUMNI.

**JANETTE HOPKINS**  
Shaker Heights, Ohio.

Jan is the daughter of Rollins alumna Mrs. Ben Hopkins who is active in Ohio alumni affairs. Already a member of the cheerleading squad, Jan has rapidly adapted to Rollins life. She wants to major in behavioral sciences.

**GARY ALEXANDER**  
Fort Lauderdale.

Ranking number 1 in a class of 750, Gary is one of the top men, academically, in the Freshman Class. He earned a National Merit Letter of Commendation and an academic scholarship to Rollins.

**SARA HAMILTON**  
Prairie Village, Kansas.

Known for her outstanding abilities on the tennis court as well as for her scholastic abilities, Sara was in the top 4% of her class, hopes to major in education and become a teacher. She also plans to take advantage of Rollins' fine tennis program and sunshine while in Winter Park.

**PAMELA SMITH**  
Sarasota, Florida.

Michigan's winner in America's Junior Miss Contest, Pam is a talented musician. Using the \$1,000 scholarship which she won in the Junior Miss competition to further her education here at Rollins, Pam hopes to major in theatre arts.

**NORMA RAMBEAU**  
Winter Park, Florida.

Another outstanding student, Norma received a full academic scholarship to Rollins. She wants to be a librarian and during the past summer she worked in the Rollins Library.

**TONG HOON LEE**  
Seoul, Korea.

Lee came to Rollins on his own after serving a tour of duty in the South Korean Army. He hopes to major in business administration. He has a brother attending Fairleigh-Dickinson College and a sister attending Colorado College.

**ELIZABETH "DOLL" STORY**  
Oriskany, New York.

"Doll" was featured in the August 5, 1968, issue of "Sports Illustrated" for her proficiency on the golf course. As valedictorian of her class, she also earned a scholarship which will assist her toward her goal, which right now leans toward the field of psychology.

**DANA R. SHELTON**  
Houston, Texas

Dana is the son of Rollins alumnus, William R. Shelton, Jr., '48, who is now a free-lance writer. Dana's major study plans are undecided at present.

**PENNY BRANSCOMB**  
Sheffield, Alabama.

Penny is our other National Merit Scholarship finalist and a straight-A student who graduated in the top 1% of her class. She is interested in music and art and will major in voice, psychology or mathematics.

**JUAN PEREZ-LANZENI**  
Cordoba, Argentina

Juan is the recipient of the Winter Park Rotary scholarship. He hopes to become a lawyer and wants to major in law and politics.

**MARIANN BOUVIER**  
Winston-Salem, North Carolina.

Mariann is one of Rollins' two National Merit Scholarship finalists and an honor student all through high school. She ranked in the top 3% of her graduating class of 517 and hopes to major in modern languages.

**CHARLES MORTON**  
Fort Lauderdale, Florida

An outstanding athlete, Charles received a full athletic scholarship to Rollins this year for his basketball and baseball abilities. He expects to major in mathematics.

The story of adult education at Rollins College going back to the administration of the late President Hamilton Holt has been told before. We have been involved in the more recent development of Community Courses initiated by President Hugh McKean at the beginning of his administration in 1951. Since then it has kept pace with the economic growth of Central Florida, including Cape Kennedy, by utilizing the resources of the College to the utmost and adding to it a large amount of talent which has come to the area from other parts of the country. The extent of adult education at Rollins College at the present time includes:

1. Creative Arts, an informal non-credit program for children as well as adults in music, art, theatre, etc.
2. Graduate Programs in Business Administration, in Education, and in Physics
3. An undergraduate degree program of evening courses under the Central Florida School for Continuing Studies

The account which follows is addressed to a description of the purposes, scope, and achievements of the School for Continuing Studies.

During the ten years until 1961 the College offered college credit courses both on the Campus and on the nearby military installations, including Patrick Air Force Base. From this experience a program of studies evolved through which students could earn the degree Bachelor of General Studies without leaving their occupations.

The BGS degree program was naturally influenced by the liberal arts tradition at Rollins College, but at the same time, it was constructed to serve realistically the needs of adults in their varied interests and occupations. There have been some refinements in the original BGS degree requirements, and there probably will be more as time goes on. A brief description of these requirements is perhaps pertinent at this point.

All students have to complete a stated number of semester hours

in English composition, the humanities, the social sciences, and mathematics and/or science as distribution requirements. Under appropriate conditions, some of these may now be fulfilled by scoring well on comprehensive tests available from the College Level Examination Program of Princeton, New Jersey. These tests are administered at the Education Offices on military installations, and are also given by the College twice a year. In addition to satisfying the distribution requirements, degree candidates must select one of five fields of concentration which the School for Continuing Studies now offers and complete at least thirty semester hours in the field. The fields now available are: 1) Humanities; 2) Social Sciences; 3) Business Administration and Economics; 4) Mathematics and Science; 5) Preparation for Teaching. It is conceivable that other fields of concentration will be added in the future. One that is being planned at the present time is the field of Public Administration which could include courses in law enforcement, fire safety and prevention, public recreation, and public finance, for example.

The administrative direction and control of the School for Continuing Studies is under the Administrative Council which is made up of the Faculty-Administration Committee and certain administrative officers of the College, ex officio. This provides the necessary coordination of activities with the College as a whole. It might be mentioned here that General George F. Schlatter, USAF retired, has served well as the first and only director of the Patrick AFB Branch since the degree program was begun in 1961-62. The growth and success of the Branch operation are due in large measure to his hard work and that of his faculty, both full-time and part-time. On the local scene we should mention the fine co-operation of a Rollins Alumnus, Donald Sisson, class of '49, who has been Head of Education Services Orlando Air Force Base for some thirteen years and continues in this capacity for the

in-coming Orlando Naval Training Center.

The teaching faculty at the Patrick AFB Branch is made up of seven full-time and eighteen part-time instructors. Here on the Campus operation of the School for Continuing Studies we have about sixty-five part-time instructors. One-third of them are full-time Rollins faculty members who teach an evening class per week as extra. The other two-thirds of the faculty are employed outside the College. These people have professional backgrounds and educational experiences comparable to faculty members teaching similar courses. They are carefully selected and, being in the mainstream of current events, are in a position to keep up-to-date on developments in their fields. Since many of the students are likewise very much involved in both military and civilian current events, some of the classes turn out to be very stimulating experiences for the participants. The exchange of views and ideas in discussion is encouraged by the policy of keeping the class size to thirty or fewer students when possible. Many students have remarked that this situation was much better than at institutions which they previously attended in large classes where they were just a number.

The variety of previous educational and work experiences for students attending the School for Continuing Studies is very wide. Only about ten percent of them have not previously attended college; many have attended several colleges intermittently over a period of many years. Some students have not previously completed high-school in the traditional way, but have obtained high school equivalency certificates by successfully passing the high school GED tests. It is amazing, but nevertheless true, that some of these students, through individual reading and study, have been successful also with college-level comprehensive tests. In that way they have been able to earn college credits before attending classes. This proves to me at least, that talent,

hard work, and motivation are the ingredients of success in college work as in other activities of life. In a similar way we have found that poor performance in previous college work due to military, marital, or financial obligations and difficulties at the time does not preclude acceptable or even excellent work in the environment of classes for adults.

Most of the students attending the School for Continuing Studies definitely plan to continue their college education and obtain the degree. The number who have earned the BGS has increased from 17 in 1962 to 173 in 1968, the total being 568. A survey of the post-degree activities and attitudes of these individuals is being conducted by mail this summer. To date 230 have completed and returned personnel questionnaires. The information will be analyzed and should lead to further improvements and development of the program.

The field of concentration attracting the most enrollees is Business Administration and Economics. It is followed in order by Preparation for Teaching, which is favored by women and many military retired personnel, and then Mathematics and Science. As would be expected, many BGS graduates continue graduate work at Rollins in the graduate programs in Business Administration and in Education.

Many individuals whose formal education was interrupted have nevertheless through years of successful work experience and promotions secured positions well above their academic level. For such people a degree is not only desirable but necessary and the opportunity to earn it without leaving their work is a great boon. Results of the survey of BGS graduates indicate that a very significant economic benefit accrues with continuing education.

Finally, the School for Continuing Studies serves the needs of many other people who already have degrees, but who need certain courses for certification or professional advancement. Then there is

# The BRIDGE at EDUCATION GAP

by GEORGE SAUTE

Director, Central Florida School for Continuing Studies

always the fact that new courses are introduced into the program as well as new concepts, and new ideas are incorporated into old courses. As time goes on the need for updating information will increase. If the student does not need or cannot use the credit he may register as an auditor. It is hoped that some plan will be devised to attract more auditors in the courses.

In conclusion, it was noted by many of the respondents to the survey that the School for Continuing Studies could be characterized as "the College that cares." In many institutions large student populations have forced methods of mass production to be used; up to this time, we have been able to keep education personalized, and shall do all in our power to continue that way.

*Professor Saute has been the Director of the Rollins School for Continuing Studies since 1961. He has been on the staff at Rollins College since 1943, and holds the Ph.B. and A.M. degrees from Brown University. He is a Phi Beta Kappa.*

# Information Please

## MARTIN MARIETTA CO. MATCHES GIFTS

The Martin Marietta Company of Orlando has announced it has joined the Corporate Matching Gift to Education Program. The company will match a gift from \$25.00 to \$1,000.00 which an employee makes to his Alma Mater. We have over 200 Alumni who are Martin employees. How can you miss taking advantage of a 100% return on your investment?

## COACH BOYD COFFIE SELECTED

Champion Auburn placed five players and its manager on the 1968 New York-Pennsylvania League all-star baseball team. The complete all-star team, headed by Auburn Manager **Boyd Coffie** was selected by the league's President Vincent McNamara. Auburn is a representative team of the Minnesota Twins. Their record for the season was 49 won and 25 lost, with a pct. of .662.

## ROLLINS CHAIRS

Do you plan to give your wife or husband a **Rollins chair** for Christmas? If so, they must be ordered before November 15. Delivery cannot be guaranteed on orders received after that date.

## LETTERMEN NOTE

On the back cover of this issue, you will see where we plan to have a "**Lettermen's Homecoming**" November 29-30. All former lettermen should receive a special letter of invitation. Our records on former lettermen may be incomplete. If you do not receive a letter of invitation, please advise the **Alumni Office**.

## FACULTY AND STAFF ADDITIONS

**Dr. Donald W. Hill**, dean of **Rollins College**, has made an official announcement to the **Alumni Record** concerning faculty additions for the academic year 1968-69.

**Dean Hill** said that nineteen new teaching faculty members were appointed to fill positions in ten different departments. Also, four librarians with faculty rank and three administrative staff persons (all **Rollins** graduates) were named early in the summer.

Among those teaching at **Rollins** for the first time, six are in the social science division and four are in science and mathematics. Others include: two each in education, history and public affairs, and in humanities (one in English, one in French); one each in behavioral science, economics, and art.

The trio who recently assumed their duties on the **Rollins** staff are: **G. Thomas Wells**, '59, materiel operations manager; **Thomas Brew**, '65, admissions representative; and **Michael Marlowe**, '65, director of placement and financial aids.

Included among the new faculty are: **Dr. Elinor Miller**, Associate Professor of French, formerly taught at Temple Buell College, Denver. She earned her doctoral degree at the University of Chicago. **Dr. Leo Morin**,

# tar topics...

Assistant Professor of Biology, completed his Ph.D. degree this summer at Boston College where he has done research through NASA. **Dr. Roger F. Polcyn**, Assistant Professor of Physics, completed his Ph.D. degree at the University of Miami this year. His earlier academic work was at the College of Steubenville in his hometown and Miami University. **Dr. David I. Richard**, Assistant Professor of Biology, received his Ph.D. degree from Ohio State University in June. His B.S. degree was earned at Capital University and his M.S. degree at Ohio State. **Dr. Raymond Roth**, Professor of Mathematics, earned both his B.S. and M.S. degrees at St. Bonaventure in New York, and his Ph.D. degree at the University of Rochester. He has distinguished himself in the academic, industrial and governmental fields. Dr. Roth is the first Archibald Granville Bush Professor of Mathematics. **William M. Schneider**, Assistant Professor of Anthropology, is presently completing his Ph.D. dissertation at the University of North Carolina at Chapel Hill, where he also achieved the B.S., the L.L.B. and the M.A. degrees.

**Vito P. Caggiano**, Associate professor of Art, Head of the Department, Curator of the Museum of Living Art, is completing his doctoral work at New York University where he received his M.A. degree. Mr. Caggiano was Chairman of the Art Department at Drury College for two years. **William A. Farmer**, Assistant Professor of Economics, attained the M.B.A. degree from Rollins in 1963. Following further study at the University of Florida, he returned to teach at Rollins in the Master of Commercial Science program. **A. Arnold Wettstein**, Assistant Professor of Religion and Assistant Dean of The Knowles Memorial Chapel, was formerly pastor of the Community Church at Vero Beach. He received his doctoral degree in October, 1968, from McGill University. **Dr. Marshall M. Wilson**, Assistant Professor of Education, received both his M.Ed. and Ed.D. degrees from Duke University. **Peter Robinson**, Visiting Lecturer, Latin-American Studies, received his B.A. and M.A. degrees from Cambridge University.

Morin

Roth

## WHO? WHERE? WHEN?

Please, please, please fill out the biography sheet on the facing page, and mail it **NOW!** We are attempting to program all our **Alumni** and their activities on computer and need this information about **YOU!** Thanks.

## WANTED: CLASS RINGS

Are you still wearing your **Rollins** class ring? If not, wouldn't you like to donate it to the Archives at **Rollins** where it will be cherished forever? We have three so far: 1910, 1919 and 1929.

## POST SCRIPT

**Walt Hundley**, our **Director of Alumni Affairs**, has been awarded a contract to officiate professional football in the Continental Football League. **Walt**, who has officiated over ten years, including the Big Eight Conference, will be headlinesman in each of the **Orlando Panther** home games.

Wilson

Richard

# memo

## FROM THE DIRECTOR

Walter M. Hundley  
Director of Alumni Affairs

### WHERE DOES YOUR MONEY GO?

A university president once said: "Nothing is more important than the critical and knowledgeable interest of our Alumni. It cannot possibly be measured in merely financial terms." Another private college president said: "The greatest single source of improvement can come from a realization on the part of a broad segment of our population that higher education **must** have support. Not only will people have to give more, but more will have to give."

But do Rollins Alumni understand? A special study made recently found that:

- 59 per cent of persons with incomes of \$10,000 or over do not think higher education has financial problems.
- 52 per cent of college graduates apparently are not aware that their Alma Mater has financial problems.

As an Alumnus of Rollins College, you might find the specific facts contained in the accompanying charts about your Alumni Association of great interest.

Rollins College and its Alumni Association have enjoyed a steady

growth over the past several years. But paralleling this growth has been the constant rise in operating costs. For instance, our Alumni constituency has grown to over 10,000 with nearly 2,000 of these "lost." Issues of the Alumni Record have grown in quantity and quality. Alumni reunions grow bigger and better.

Although the increase in Alumni contributions has grown substantially during this time, it has failed to keep pace.

The operating budget of your Alumni Association is offset entirely by unrestricted gifts to the annual Alumni Fund (this includes the Hamilton Holt Club Fund, which is an integral part of the annual Alumni Fund) with the difference having to be made up by the College.

Although 1967 saw a record year in **total** Alumni Giving, \$193,000 of the total was a one-time gift of property made for the purpose of endowing a chair in physical education. Therefore, the income from this wonderful gift will not affect the Alumni support picture directly. In addition, over \$60,000 of the total was restricted to the Enyart-Alumni Field House.

In 1967 our staff efforts were geared primarily toward the successful completion of the Field House financing, however, the income from this project in no way helped offset our operating budget. Therefore, in 1968 our efforts have been and will be focused toward increasing participation in the Alumni Annual Fund, both in total dollars and number of donors. Gifts to the Annual Fund indirectly release college funds for such projects as student aid, faculty salaries, etc.

Meanwhile, there is considerable pressure on the Alumni Association to launch other capital fund drives, such as the great need for a new Crew boat house, a swimming pool, etc. Undoubtedly these are worthwhile projects, and ones which no doubt interest many Alumni more than does the Annual Fund, yet we **must** bring the Annual Fund to a level greatly exceeding the operating costs.

Increased financial support from Alumni, although not the only source of aid to the college, is perhaps the most significant, as the degree to which an Alumnus supports Rollins governs greatly the amount of financial support from interested individuals, corporations and foundations.

The crisis that faces higher education in general faces Rollins College too. How well her Alumni respond to increasing needs will have a direct bearing on her continued growth and prosperity. As an Alumnus of Rollins College, your decision will govern greatly the direction of your Alma Mater.

ALUMNI ASSOCIATION EXPENSE SUMMARY				
	67/68	%	Est. 68/69	%
<b>PERSONNEL</b>				
Salaries	\$31,477		\$32,865	
Taxes	646		800

Telephone	1,449		1,500	
Miscellaneous	1,392			
<b>Totals</b>	<b>\$ 3,284</b>	<b>4.8%</b>	<b>\$ 1,875</b>	<b>3.0%</b>
<b>TOTAL</b>	<b>\$69,103</b>	<b>100.0%</b>	<b>\$65,661</b>	<b>100.0%</b>

(A) In fiscal 67/68 this item included all printing on supplies such as brochures, envelopes, etc. In fiscal 68/69 this will be moved to the Public Relations and Publications category.

(B) In fiscal 67/68 this item included the Director's considerable travel while establishing clubs around the country as well as a California convention. It also includes expenses involved with Reunion. In 68/69 the frequency of travel to Clubs, etc., will be greatly curtailed.

(C) In fiscal 67/68 the \$12,296 was the publication of the ALUMNI RECORD only, sent to nearly 9,000 Alumni at no charge, while in 68/69 only \$10,000 has been allotted to the ALUMNI RECORD perhaps reducing the number of issues to three. The other \$5,000 is for printing moved from category explained above.

INCOME FROM ALL ALUMNI GIVING			
Category	Calendar 67	%	Projected Calendar 68
Alumni Annual Fund	\$ 32,404	10%	\$ 50,000
Enyart-Alumni Field House	60,259	19%	76,000*
Property for Endowment**	193,000	60%	
Other restricted gifts	33,812	11%	100,000
<b>TOTAL</b>	<b>\$319,475</b>	<b>100%</b>	<b>\$226,000</b>

\* Represents pledges due and paid in 1968.

\*\* The 1967 gift of income-producing property represents a non-recurring item of income.

# news of the classes

WON'T YOU PLEASE HELP YOUR ALUMNI OFFICE UPDATE ITS FILES BY SENDING IN ANY INFORMATION YOU MIGHT HAVE ON THE LAST KNOWN WHEREABOUTS OF THE "LOST" ALUMNI WHOSE NAMES APPEAR IN THE FOLLOWING COLUMNS?

## GAY 90'S

Surprisingly because of the few students in the early years, we have twenty-three students living. In the vicinity of Rollins there are from Orlando: Mr. **WILLIAM HUFFSTETLER**, the champion bicycle racer, who is in a wheel chair at 57 West Pine Street (celebrated his 92nd birthday on the Fourth of July), with his younger sister, **DAISY HUFFSTETLER** (Mrs. Day) Muir, Miss **ANNA RAND** of 5 North Osceola Street, and Mrs. Philip (**MARGARET DELANEY**) Slemmons of 339 Cherokee Drive and Judge **FRANK MILLER**, still active as Judge of the small claims court and **FRED ENSMINGER** ex-librarian of the Sanford library and minister of Sanford, Ohio covers the next three students: Miss **MARY PIPER** of Springfield, graduated in 1899, and **PAUL BROWN** of Toledo and Dr. **RUTH FORD** (Mrs. Daniel) Atkinson of Ney, Ohio, who has been visiting in Covington, Georgia this summer. Her cousin **FAYE FORD** (Mrs. Theodore) Betak is in a home in Evanston, Illinois. There are two former students in Tampa, Florida, Mr. **ARTHUR LEWIN** and Mrs. **MARIAN WOODSUM** Turner. Jacksonville, Florida has two former students Mrs. **FRANCES CAREY** Allen and Mrs. **GRACE UNDERHILL** Munroe. Connecticut has two former students, Miss **AMY HERRICK** and **MARION COAN** (Mrs. Henry) Barnes. Florida also has **MAUDE OBENCHAIN** (Mrs. John) Abernathy and Mrs. **LORENA DIMICK** Baker of Wildwood. Miss **ETHEL BENDER** lives in St. Louis, Missouri and Mr. **CHARLES T. COLEMAN** in Osceola, Arkansas, and Mrs. John B. (**MAY MOREMEN**) Gordon in Winston-Salem, North Carolina. The two most distant Gay 90's are Miss **BEATRICE FENETY** of New Brunswick, Canada, and Mrs. **EMILY PELTON** Shotts of Corona, California. Rah for the Gay 90's!

## 1900

**MAMIE BLUE** (Mrs. J. E.) Kelley celebrated her 85th birthday, June 19th.

## 1904

### HELP! WE'RE LOST!

If you know where we are, or who could find us, please notify the Alumni Office!

Lewis Hilson  
Cora Mawhinney

James F. Shivler  
Estelle Adams Shivler

## 1905

**EMMA OLMSTEAD** (Mrs. Wendall) Wright is a graduate of the music department of Rollins College, and has taught piano ever since. She has been an appreciative attendant at the Boston Symphony for 50 years. **EMMA**'s son is an engineering inspector for a nationwide fire protection company, and will attend his 35th MIT reunion next year. Her husband died in 1963. She is now retired and resides at 1003 Howard Street, Wheaton, Illinois.

Since leaving Rollins, Dr. **JAMES B. PARRMORE** has received an M.D. degree from the University of Maryland, an LL.B. degree from Southeastern University and in 1931 was given a certificate in Public Health from the University of North Carolina. The State of Florida sent him to Key West as director of the Monroe County Health Department. He suffered a severe heart attack in 1949 and resigned. He is now retired and lives in Hialeah, Florida. Your scribe, **ADA BUMBY** (Mrs. W. W.) Yothers, regrets that impaired vision due to glaucoma will prevent her joining you at future Rollins functions.

## 1909

### HELP! WE'RE LOST!

If you know where we are, or who could find us, please notify the Alumni Office!

Robert S. Franklin, Sr. Fannie Drennen Hewitt  
Linnette Branham Peak

## 1911

In line with the traditions of Rollins College, Dr. **ALFRED J. HANNA**, ('17), Vice President of Rollins and long-time friend of the late **ANDREW LOUIS AHK**, has started an Ahik Book-A-Year Memorial. This tribute is in recognition of his long years of service. Among those who have already contributed to this memorial are: **GIRARD DENNING** ('05), Misses **ETHEL** and **ALICE M. CAMPBELL** ('23), Miss **ANNE STONE** ('18), Dr. **FLORENCE STONE** ('19), and **HAROLD A. WARD**, ('25).

## 1914

### HELP! WE'RE LOST!

If you know where we are, or who could find us, please notify the Alumni Office!

Horace Edward Alleman Erwin L. Holmes  
Priscilla Major Hubbell

## 1917

**MARGUERITE ENLOW** (Mrs. ROLAND) BARZE and Mrs. Agnes Ronald (wife of Alumnus **WILLIAM RONALD** '06) sponsor a poetry group which meets monthly. **MARGUERITE** is active in NLAAPW, and in PSA (Poetry Society of America.) She is listed in Who's Who of American Women. After serving many years as your class secretary, **MARGUERITE** has resigned and **LOUISE B. WIMBISH** has graciously accepted as her replacement.

## 1918

**SARA YANCEY** Belknap is head of the reference library of Flagler College for girls. This school has taken over the Ponce De Leon Hotel in St. Augustine.

## 1919

### 50th Anniversary Reunion

### HELP! WE'RE LOST!

If you know where we are, or who could find us, please notify the Alumni Office!

Thelma Dempsey

Dr. **B. CHANDLER SHAW** plans to return to the campus for his 50th Class Reunion.

## 1924

### 45th Anniversary Reunion April 25-27, 1969

### HELP! WE'RE LOST!

If you know where we are, or who could find us, please notify the Alumni Office!

Margaret Sedgwick  
Bengston

Russell C. Froemke

## 1926

**BERYL BOWMAN** retired last June after having taught many years in the Orange County Schools.

## 1927

Mrs. **MIRIAM BOYD** Thomas has retired this past year as principal of Princeton Elementary School after serving there for 24 years as teacher and principal. She is listed in Who's Who in American Education.

## 1928

**JAMES NEWTON** and his wife planned their first trip in a plane to see their son, who is a Navy Chief in San Diego, and on the way home stopped in Deming, New Mexico to visit their daughter.

"RED" **WINDERWEEDLE** was recently honored by being elected a Director of the University of Florida Foundation.

## 1929

### 40th Anniversary Reunion April 25-27, 1969

### HELP! WE'RE LOST!

If you know where we are, or who could find us, please notify the Alumni Office!

Catherine Adams  
Morris W. Bartlett

Ruth Brady Fox  
Ross E. Robertson  
Marian A. Youngs

We extend our sympathy to **RODMAN LEHMAN** upon the death of his mother, August 5, 1968.

We were saddened to learn of the death of **VIRGINIA MITCHELL**'s brother, Jack Emerson.

## 1930

### WEDDINGS

"Boots" **WESTON** Tuttle and Ernest Chapman on July 13, 1968.

## 1931

**NICK ORSZAGH**, living in Budapest, Hungary, has written a book entitled, "The History of American Literature." The preface of his book expresses his gratitude to Rollins College. He also has sent a copy to the College library.

**WILFRED RICE** and family enjoyed an Avion trailer trip last summer — a rendezvous of some 600 trailers at Beech Bend Park, Kentucky, then on to a 3 week vacation to Ela, North Carolina, and surrounding towns.

**ILENE HALL** has retired as medical record librarian at Florida Sanitarium & Hospital.

## 1932

**JACK (GEORGE H.) KERR** has written two impressive books, "A History of Okinawa" and "Formosa Betrayed." He normally headquarters in Honolulu but has been in California finishing another book for Houghton-Mifflin publishers.

Dr. **KENNETH CURRY** is putting together a short book on a project in which Walter Scott and Robert Southey were involved.

## 1933

Our 35th Reunion at Rollins was observed last April 26, 27, 28 — can you believe it? Not too many of us showed up — but it was nice to see the ones who did. **JEAN FULLINGTON** (Mrs. David) Shepard drove over from New Port Richey. **SYLVA FELL** (Mrs. Bruce H.) Carpenter, whose address is 915 Cordova Road, Ft. Lauderdale, attended, looking young and vivacious — **SYLVA** has one daughter in Panama with two children and one daughter-in-law with three children living in Ft. Lauderdale. **POLLY DUDLEY** Winans dropped in from Clearwater. **JANE WELHOFF** Thompson was helping with the festivities — Jane has five children, Jane, a senior at Rollins (graduated last June), George and Clare who are working and Grace and Holly who attend High school in Winter Park. **DOROTHY SHEPHERD** Smith and I had a nice visit at the Saturday President's lunch.

eon, she lives in Winter Park too. **DOROTHY SMOAK RICE** was there from Miami with her husband — looking much the same as when in school and being a grandmother — just happened to have pictures of her good-looking sons and their children — and I, your class secretary, had to show her a picture of my new daughter-in-law.

**NAOMI FERGUSON** MacCaugherty is employed as an accountant with Duke University. She is a soloist in the First Presbyterian church choir, also Durham Civic Choral Society. **NAOMI**'s older son, Cameron, is a senior at the University of North Carolina medical school and younger son, Robert Jay, a junior at Duke University.

## 1945

**JOCELYN BOWER** (Mrs. Charles) Booth silk screens her own paintings. She recently displayed her watercolors in a three-man Connecticut exhibition.

## 1946

**HALLIEJEANNE CHALKER** commutes between Tequialpa, Honduras and Washington, D.C. and a quick stopover in Jacksonville to visit her mother. She recently routed her motor return through Central America and Mexico. **HALLIEJEANNE** is an officer in the diplomatic corps in charge of assigning all state officers to posts in Latin America and islands in the Western Hemisphere.

## 1947

**BETTY ROSENQUEST** (Mrs. E. Carroll) Pratt brought home top honors for the Ladies National Tennis Championships last August in Rhode Island.

Major **DAVID FRAZIER**, a pilot, is on duty in Vietnam. "**KATHY**" **BETTERTON** (Mrs. Billy) Napier and her husband and daughter have moved to McCoy Air Force base near Orlando, Florida. Her son graduated this year from the University of the South in Sewanee, Tennessee, and is now a 2nd Lieutenant in the U.S. Air Force.

## 1948

**MURIEL FOX** (Mrs. Shepard) Aronson was the subject of an article in July 27, 1968, **SATURDAY EVENING POST**, in a feature story "Women at Work: Is There Room at the Top?" by Marilyn Mercer. **MURIEL** did become a vice president of Carl Byoir, a public-relations firm with industrial accounts, but she is aware of the problems a woman has in a man's world!

**JOYCE JUNGOLAS** (Mrs. William) Attee has given a Book-A-Year memorial for Captain McCrea B. Tuttle ('65).

**ALICE O'NEAL** (Mrs. Paul) Dye won the North-South Amateur last spring.

**LOIS ADAMS** (Mrs. Stanley) Stipick has retired after 34 years of public service.

**OLGA LLANO (MRS. WARREN) KUEHL** made her concert debut in Carnegie Hall last May 12, 1968 with a piano recital on the Music of Spain including works of the 18th, 19th, and 20th century. In attendance at her Carnegie recital were Mr. and Mrs. Dave (**MAGGIE BELL** '50) Zurbrick, Mrs. **MURIEL FOX** Aronson ('47) and Mrs. Edward (**LOIS KHODAKOFF** '47) Wittcoff. **OLGA** is presently on the music faculty of Kent State University while her husband, **WARREN**, Ph.D. serves as chairman of the history department at the University of Akron.

OLGA LLANO KUEHL

**JEAN CARTWRIGHT FARRENS** (Mrs. Gerald) is on television WJXT channel 4 "Midday" in Jacksonville, Florida.

**MILTON STANSON** is a creative marketing specialist, and has his own firm. **MILTON** says his firm is unlike other management consultants "we tell clients how to make more dollars, not save a few pennies by economies."

**PATRICIA MEYER** (Mrs. Barry) Spacks has been appointed to the rank of Professor of English by the president of Wellesley College. Not only has she received a B.A. degree from Rollins, an M.A. from Yale but has achieved a Ph.D. from the University of California. Her field of special interest is 18th century poetry. Research on the supernatural horror in English Poetry of the 18th century led to her book "The Insistence of Horror" published in 1962. Two years later her anthology "18th Century English Poetry" was published. She is also the author of numerous articles, some of which have appeared in Modern Language Quarterly, Religion in Life, Essays in Criticism. Her two most recent books are "John Gay" (1965) and "The Poetry of Vision" (1967). Dr. Spack's husband is also an author and teaches English at MIT.

**T. R. McELWEE**, an Orlando Realtor, is a republican candidate for the Orange County Commission.

Eleanor and **EDWARD ROSEVEAR** are attending Colorado State College to complete their Master's program.

## 1950

**THOMAS E. MULLEN** has been made Dean of the College of Wake Forest University.

## ROLLINS COLLEGE MILLS MEMORIAL LIBRARY Book-A-Year Club

*One of the most enduring and rewarding traditions at Rollins is the endowment of a book, in perpetuity, in memory of each alumnus who has passed on.*

*Classmates and other friends, as well as the family concerned, are invited to send remembrances for any amount and thus participate in the BOOK-A-YEAR CLUB Memorial Program which provides for the Library an urgently needed book in the name of an alumnus.*
